Biostatistics covariate adjustment hackathon

Introduction to the lava R package

BKTS

October 29, 2026

Introduction

introduction to the package

lava sim example

```
1 library(lava)
2
3 onerun <- function() {
4   return(data.frame(a = rnorm(1), b = rnorm(1)))
5   return(c(a = rnorm(1), b = rnorm(1)))
6 }
7
8 res <- lava::sim(onerun, R = 10)
```

Introduction to exercises

- introduces hackathon repository
- introduce exercises
- introduce quarto on posit workbench (incl. rendering)
- maybe basic R syntax?
